

Why are Championship fabrics the leading choice of the Commercial, Coin-Op, Home and OEM markets?

Championship offers premium performance billiard fabrics in a complete line of Worsted, Woolen and Specialty Fabrics in over 29 decorative colors.

Championship Fabrics stand up to hard commercial use, yet satisfy the most discriminating professional and amateur players.

Championship sets the pace for major innovations in billiard fabric. Our staff's 342 years of total experience with the game, the industry and its organizations makes the difference.

Highlights of Championship Value...

- Complete Selection of Worsted and Woolen Fabrics in Pre-Cut Beds and Rails
- Two Pieces of Matching Silver Cup Chalk with Every Pre-Cut
- No Hidden Defects
- Backed and Unbacked Fabrics
- Playing Surface Identified
- No Seams in Backing
- Soft Fold with Cut Beds and Rails

As a long time, leading supplier of Cushion Rubber to the Billiard Industry, Championship has had an ongoing research and development program to produce the best quality and most consistent playing billiard cushions made today. After consulting with professional players and leading polymer chemists, Championship has developed a line of billiard cushions that set new industry standards.

To ensure that Championship's strict testing criteria and tolerances are met, we developed our own American Made tooling. Championship's tooling, "state of the art" manufacturing facility and strict quality control measures assure maximum integrity of formula and proper cure of each and every production run. The result is a line of Billiard Cushions with exacting tolerances required in durometer, dimensional accuracy, rebound, specific gravity elongation and overall performance.

Through formula, quality control and all of the other factors mentioned above, Championship has obviated the need for a canvas control strip across the top of its billiard cushions. Feel free to contact Championship's Sales Representatives if you would like to discuss why canvas control strips aren't used on our cushions and how more often than not; canvas control strips cause inaccuracies in most of the cushion rubber out on the market today.

Both of Championship's billiard cushions, Mercury and Pro-Am, came within BCA standards for accuracy 100% of the time at all three speeds. None of our competitor's billiard cushions that we tested came close to demonstrating the accuracy Championship's billiard cushions achieved. You can't beat 100% accuracy.

Perhaps equally impressive to its accuracy is the price of Championship's billiard cushions. Championship is able to provide the industry with the most accurate playing cushion rubber known at prices competitive with lower quality imports.

Making high quality billiard products at affordable prices is what we do here at Championship. Our line of billiard cushions is just another example of how we continue to "set the standards" in billiards.
